joy with water

megica
group

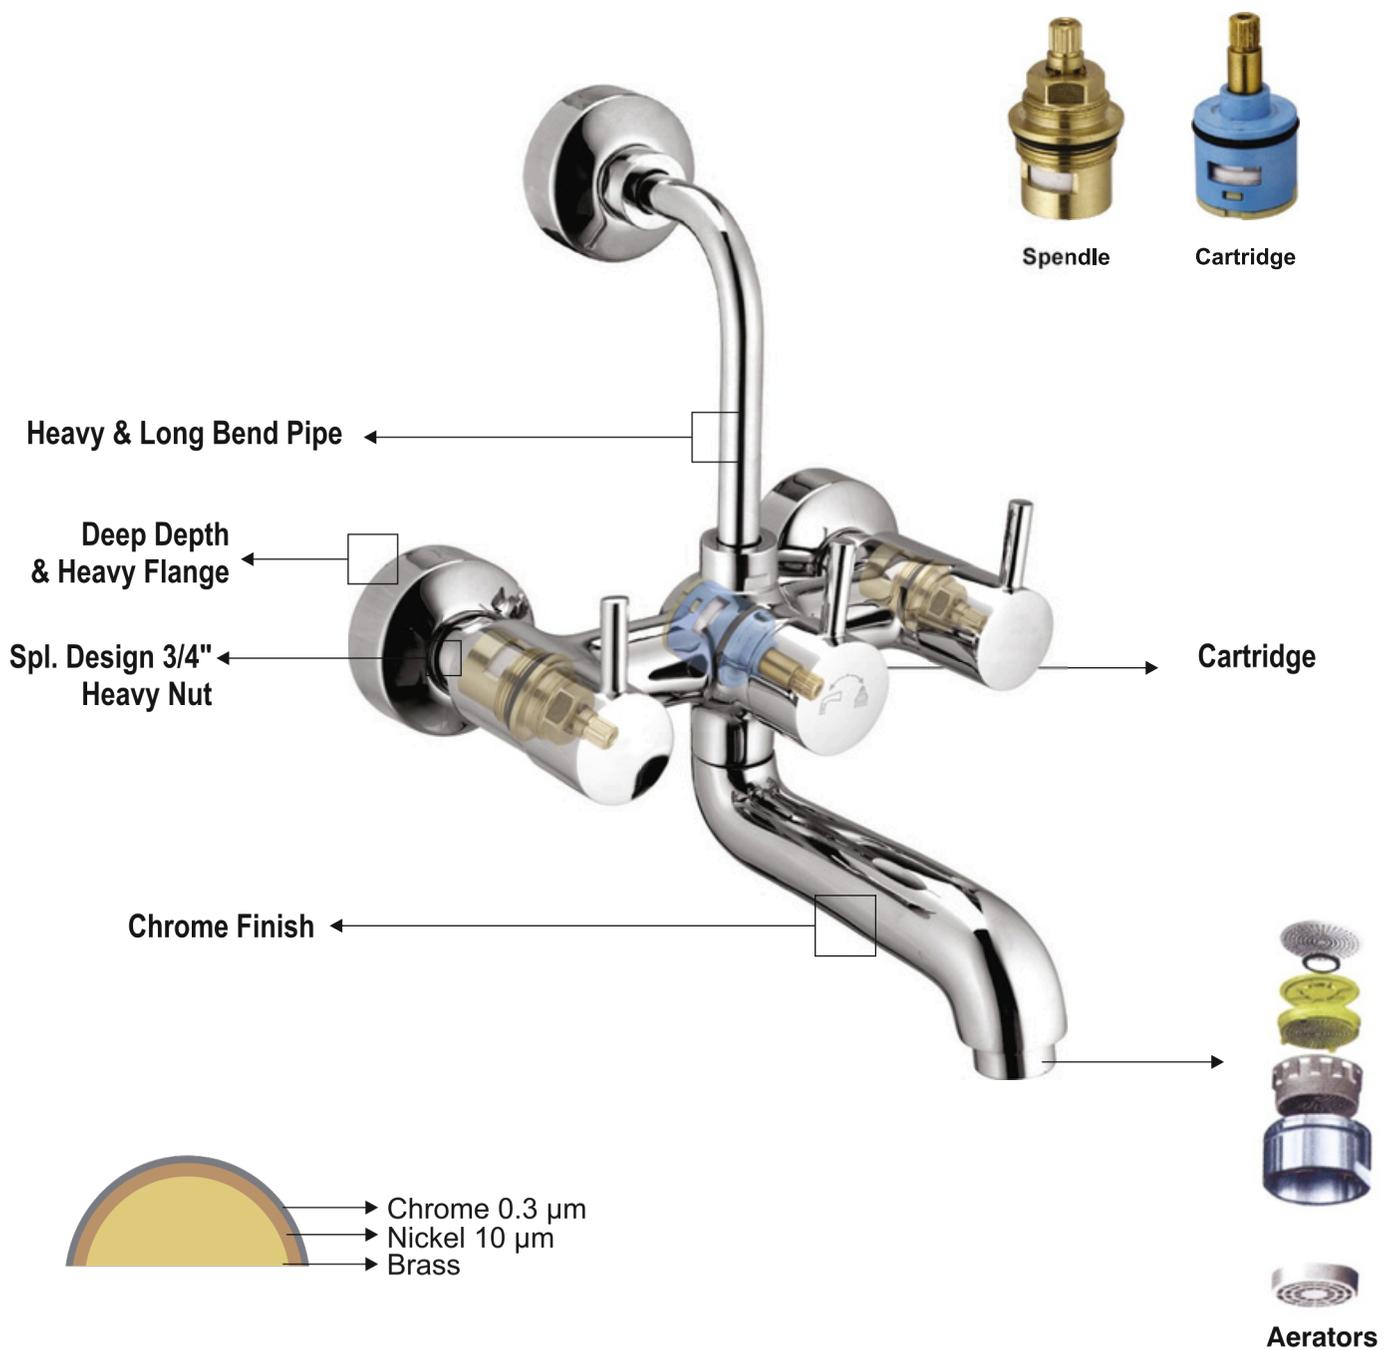

A modern, sleek chrome faucet is the central focus of the image. It features a curved spout and a horizontal handle. The faucet is set against a background of a bathroom with a shower curtain and a towel rack. The lighting is dramatic, highlighting the metallic sheen of the faucet.

*The Experience of Loving
and being loved.*

FAUCET TECHNOLOGY

QUARTER TURN SERIES

The internal cartridge of all quarter turn series are fitted with specially designed Italian Ceramic disc to ensure soft movement and full flow of water even on normal pressure. Extruded brass rod is used for all metal parts of internal cartridge for flawless performance for longer period.

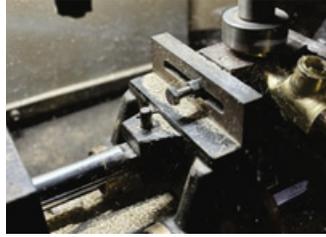

FAUCET MANUFACTURER

CASTING

We maintain a precise brass composition of 58% copper and 41% zinc. A core shooter machine plays a vital role in achieving even wall thickness.

MACHINING

The cast components are brought here to undergo a series of operations, including cutting threads, drilling holes, and creating inlets.

GRINDING

In our Belt Grinding plant, skilled workers use various tools to carefully craft faucets and bathroom accessories, achieving a smooth finish like gold plating. We prioritize precision, cleanliness, and a safe environment for our artisans.

POLISHING

Seasoned artisans employ three abrasive belt types and four cloth buffs, transforming each piece into a gleaming marvel akin to gold plating.

CHROME PLATING

It begins with ultra-sonic cleaning, a ten-minute bath that rids the components of any impurities. Following this, the faucets pass through anodic and cathodic tanks, each taking five minutes, further cleansing and preparing the surface.

QUALITY CHECK

To validate the faucet's leak resistance, we employ state-of-the-art water-testing machines. Each faucet is meticulously tested to ensure that it remains watertight, guaranteeing that it will perform flawlessly and deliver water without any unwanted drips or leaks.

What Makes our Faucets One-of-a Kind?

Brass ingots

SAVE WATER:

WATER SAVINGS - RESPONSIBLE LUXURY

Cutting-edge water maximisation techniques and the finest ideas make your EDGE experience both responsible and luxurious. You use half the amount of water for twice the amount of fun.

SAVING WATER

The planet has only 3% fresh water and we help you use that smartly, without compromising on user experience. Because our customers deserve the best life has to offer.

Our flow regulators are designed to regulate and control the flow of water to taps and showers without hampering the performance or the design of the product.

Water is for everyone and every drop counts, which means each one of us has to take care of it and save it.
